Headteacher Steven T. Clark, B.Sc.

Dear Chris, I feel that I must write to you regarding the installation of the 8 new science labs at the school. I wish to commend you and your team on the outstanding works and total professionalism given to our project.

The dedication to give total satisfaction is a credit to all involved, from customer service, communication and generally going the extra mile with nothing being too much trouble to achieve a fantastic end result. The reaction from the school governors, staff and students has been one of amazement to the transition, giving a wow factor from the previous old style labs. John, and with the assistance of Carl and dly have lead the project superbly, a pleasure to work with.

My site staff were full of praise for Interfocus as we had to work closely together on re-decoration. I would like to especially mention Charlie, he was so dedicated to achieve perfection and always kept me up to speed daily on progress of the project, a great worked ethic and huge asset to your company, and must be congratulated from all at Tabor.
